

U.S. Embassy Belgrade, Serbia
Solicitation 19RB1020Q0006
VPN Internet Service
Questions & Answers

As of February 27, 2020

1. Question: The technical specification asks for the provision of three separate Internet services each requiring its own router. Is it possible to provide the services on a single fiber pair with an adequate switch?

Answer: Internet service shall be delivered to the Embassy demarcation point via separate physical fiber string (or pair of strings) for each “Line”. This is to ensure availability of service in case of single point failure.
